

Prototype: Routine Editor

Background

- This is a feature that allows users to add, edit or delete recurring **routines** for their home automation system.
- **Routines** are a user-defined set of **activities** set to occur at specified time points.
- An **activity** is a user-defined action for the home automation system to perform.
- Access may be via a smartphone application or other system.
- The back button  returns to previous screen unless otherwise specified.

Main Screen

Back button returns to home screen.
